

## ARTRIN - Creme

Artrin is a bio-information wide-spectrum regenerative cream that contains a balanced herbal complex and high volume of thermal water from the Podhajska hot spring. It primarily influences and balances the energy channels of spleen, three burners, and stomach, controlling channel, central channel, the channels of conception, small and large intestine, tendo-muscular, liver, urinary bladder, and kidneys. It affects conditions related to dysfunction of these channels. It contains liposomes with highly concentrated peat extracts. Research confirmed that these extracts have anti-inflammatory and antineoplastic effect. Liposomes are able to penetrate into deeper skin layers where they bring also beneficial peat extracts. The peat is well known as an excellent preparation for treatment of locomotory disorders.

Up to 50 % of thermal water from the Podhajska hot spring creates the basis of this cream. With its rich mineral composition this briny tertiary seawater is absolutely unique all over the world. It's regenerative effect is longer lasting and more profound than the effect of the Dead Sea water. It has very positive effect on the joints. Salt, plant extracts and essential oils promote blood circulation in an affected area, improve nutrition and oxidation, and speed up regeneration.

Artrin contains a number of minerals and thanks to high volume of the plant extracts it is enriched with some other elements. Standard creams contain 1 – 3 % of plant extracts; the Energy regenerative creams up to 50 %. According to the laboratory analyses Artrin contains high percentage of sodium, potassium, calcium, phosphorus, sulphur, magnesium, lithium, manganese, silicon, and a number of trace elements. In the depth of 2 000 meters under the surface and under high pressure the water gains the strong energetic potential.

Perfume has its regenerative role, too. E.g., the camphor oil stimulates digestive system, blood circulation and heart. It has tranquilizing effects and is used in treatment of rheumatism besides other uses. Except for tranquilizing and antiseptic effect, benzoin also shows positive effects in treatment of influenza, arthritis, gout, and respiratory illnesses. Similar excellent effects have also arbor vitae and wintergreen oils with content of natural salicylates. Furthermore, the cream contains peanut oil. According to the well-known healer Edgar Cayce this oil is an excellent substance for the nutrition of skin, muscles, nerves, and nodes, and is also suitable in cases of arthritis. It has an ability to balance relations between liver and kidneys. Artrin comprises a special complex of resins, incense, myrrh, and dragon's blood, which have analgesic, blood-circulation-promoting, anti-inflammatory, antibacterial, antiviral, and anti-microbial effects. These effects are even more enhanced with the content of wine vinegar, which, in fact, is a natural composition of AHA acids with anti-mycotic and soothing regenerative effects. It removes the itching of skin.

Artrin also comprises the active substances of ginger (*Zingiber officinale*) whose effects on vaginal trichomoniasis in vitro, bacteria *Rhodotorula glutinis*, *Bacillus subtilis*, *Pichia membranae-faciens*, and a number of other microorganisms, have been proved by researchers. At the Danish university in Odense it was discovered that the active substances of ginger control two enzymes responsible for inflammations causing pain to people suffering from arthritis. In blockage of prostaglandin synthesis it acts the same as aspirin, and thus alleviating inflammation and pain. Other researches confirmed the high effectiveness of the ginger extracts in kinetosis to such extent that their tests showed better effects than special medicines. It showed the same effectiveness, e.g., in treatment of migraines. Ginger is absolutely the best. Other Energy preparation Korolen also contains sufficient volume of ginger. We recommend to all those who suffer from unpleasant feelings while traveling (so-called kinetosis) to try Korolen combined with Artrin. Apply orally one teaspoon of Korolen either before travel, or afterwards. Apply the cream topically on the area of temples, abdomen, and under the nose. Sometimes the application under the nose is sufficient as the cream with a natural perfume acts as aromatherapy. In a nick of time it is able to affect the mental state of a man. In flatulence and for regulation of the pancreas function we can try combination with Regalen.

Artrin is applied topically on the same areas as in the aforementioned case. The effects of natural substances on the joints are fine-tuned by the bio-information of the formic acid and amber. Improvement of the skin condition is facilitated, besides linseed oil, also by vitamin E, lecithin, plant hormones of liquorice and acacia, and enzymatic extracts from Californian earthworms. The latter substance has anti-mycotic and strong regenerative effects on everything alive, including plants. Of course, Artrin also has antioxidant effects against genesis of free radicals and protects skin against unfavorable external influence, including UV radiation. The company Energy sees to the maximum effectiveness of its preparations, their purity, quality and harmlessness. Some synthetic components were tested in the laboratory as regards their possible potential harmfulness for very long time and were found to be suitable for use. This way the Energy preparations joined the rank of the top quality products.

**Symphytum officinale:** contains a healing agent allantoin; has excellent effect on regeneration of the damaged tissues. It speeds up healing of fractures, inflammation of muscles and joints, and sprains. **Acorus calamus:** applied topically has anti-rheumatic effect and facilitates the healing of eczema. It is effective in treatment of polio, and children and adult's asthenia. It has anti-allergic effect, strengthens the nervous system, and promotes blood circulation in the skin. **Conyza canadensis:** is used in cases of chronic rheumatism, gout, inflammatory processes in urinary tract, eczema, and shingles. It inhibits hemorrhage and has strong anti-inflammatory effects. **Robinia pseudoacacia:** contains plant hormones and has strong positive effect on joints condition. In homeopathy it is used in gastritis, duodenal ulcer, flatulence, and migraine. **Filipendula ulmaria:** contains natural salicylates and is used in treatment of fever, rheumatism, and polyarthritis. **Aralia mandshurica:** is used in sprains, strains, burns, thrombosis, contusions, rheumatism, and swellings. It is also used as a heart tonic. It has anti-microbial and anti-mycotic effects. **Anethum graveolens:** applied topically it affects contusions and inhibits flatulence. It is also applied in the cases of acute indisposition, kinetosis, and headaches. It promotes blood circulation in heart muscle. **Aesculus hippocastanum:** have anti-inflammatory effect and influence elasticity and resilience of vessels. It is applied in cases of insufficient blood circulation, swellings, migraines, and arthralgia. **Linaria vulgaris:** contains formic acid, malic acid, and acetic acid. It has excellent effects on various types of rashes and purulent wounds. It is also used as insect repellent. **Glycyrrhiza glabra:** contains plant hormones and has strong anti-inflammatory effect. Its effects are similar to those of corticoids. **Solidago virgaurea:** lowers fragility of blood capillaries, improves the function of atonic muscles, and thus also mobility after injuries and polio. **Laurus nobilis:** is used in the cases of itchy rashes, mycotic skin diseases, rheumatism, and diabetes. It improves the hearing and stimulates respiratory center. **Trigonella foenum-graecum:** acts as a universal tonic. It facilitates flux of pus, and is used in swellings, inflammations, bruises, diabetes, and enlarged lymph nodes. **Mellilotus officinalis:** contains allantoin and flavonoids. It palliates swellings, softens the skin, and alleviates pain, and cures ulcers and purulent wounds. It is used in treatment of headaches, insomnia, rheumatism, swellings, and arthritis. **Zingiber officinale:** is very efficient in treatment of migraines, kinetosis, swellings, and arthralgia. It has anti-bacterial and anti-microbial effects. **Humates:** are the peat extracts that have excellent effect on the whole locomotory system. They regenerate joints and have anticancer and strong anti-inflammatory effects. They also have the positive effect on the overall vitality.

<b>Storage:</b>	10-25°C, keep dry
<b>Content:</b>	50 ml // 250 ml // 500 ml

Furthermore, the cream contains bio-information of the plants and stones – crystal, fluorite, malachite, silver, sphalerite, antimony, calcite, and others. The complex of bio-active substances from the plants, minerals and bio-information may be used for harmonization of the energy channels in such conditions as pain, inflammations, degeneration and swelling of the joints, "tennis elbow", arthritis, polyarthritis, rheumatism, gout, pain in the area of small of the back, spine, and cervical muscles, disorders of the lymphatic system, after polio, muscle fatigue, chill caused by the insufficient blood circulation in the extremities and all locomotory disorders.

In cases of kidneys, urinary bladder and prostate disorders, and in inflammatory conditions the cream is applied in combination with other pentagram preparations. It is also suitable for the regeneration of bones after fractures, contusions, and polymyositis. It may be used for treatment of kinetosis, nausea, dizziness, flatulence, belching, stomachache, diarrhea, spleen and pancreas disorders, digestive disorders, migraines, CNS disorders, polyneuritis, and toothache. In cases of otitis media and tonsillitis it is recommended to combine this cream with Renol and Audiron. To boost the energy, increase vitality, and in case of overall fatigue apply the cream along the spine and on sternum. In cases of hyp immunity is Artrin applied on the area of sternum.

We recommend combination with the preparation Renol and as the case may be with other Energy preparations of the basic pentagram.

Regeneration process and application: The cream is applied topically on problematic places in very thin layer once up to three times a day. It is easily smeared and then washed off with water. Other applications are possible in the places above single organs or in the area of their reflexive zones and energy channels.

In severe health problems always consult your physician. To specify diagnosis the devices based on EAV or some other methods may be used.
