

PROBIOSAN - Capsule

THIS PRODUCT IS REGISTERED AS A FOOD SUPPLEMENT. IT IS NOT A MEDICINE AND SHOULD NOT BE USED AS A SUBSTITUTE FOR PRESCRIBED MEDICINES. Probiosan is a bio-information product containing fresh water green algae *Chlorella pyrenoidosa*, enriched with inulin and an active probiotic complex of bacteria *Lactobacillus acidophilus* and *Enterococcus faecium*.

Use: This product has a positive effect mainly on digestion and regeneration of intestinal microflora after treatment with antibiotics, steroids, or after the use of hormonal contraception. It inhibits pathogenic bacteria causing inflammations of intestines, constipation, or diarrhea. It shows strong detoxicating effect and helps when fighting allergies and fatigue.

Furthermore, the product may be used

- to improve the functioning of intestines
- to stimulate the growth of anaerobic (beneficial) bacteria
- to absorb toxins in intestines
- to stimulate regular peristalsis

The product is suitable as a dietary supplement for those requiring higher intake of amino acids (proteins) and fibers, mainly when on diet, in the period of growth, during higher physical strain, when on vegetarian diet, during and after antibiotic therapy, and in cases of higher exposure to environmental toxins.

Probiotic complex represents half a billion of bacteria *Lactobacillus acidophilus* and *Enterococcus faecium* at a 50:50 ratio. This dose ensures an effective colonization of the intestinal tract, aids in correct absorption of nutrients in the intestine, and promotes proper elimination of wastes.

Chlorella pyrenoidosa contains biologically bound vitamins (B, C, and E), minerals (phosphorus, potassium, magnesium, calcium, iron, manganese, and zinc), trace elements, amino acids, fibers, and chlorophyll. It enhances the immune system, reduces levels of cholesterol in blood and liver, and improves the functioning of the intestines and intestinal excretion.

Inulin functions as a carrier of effective substances, a source of nutrients, and as a "manager" of the environment for the probiotic complex. It facilitates the inhibition of infective diarrhea and enhance the immunity of a human body. It is known to have a positive effect on sugar metabolism, so it is quite suitable in cases of diabetes. Furthermore, it protects our intestine against inflammatory, and even tumorous, diseases.

Bio-information is a frequency emulating the controlling frequencies of the brain subcortical centers that control vegetative nervous system and the functioning of internal organs. Through their activity the negative information is blocked, and the process of reverse regeneration is started. The presence of bio-information in the Energy products is rather important – in comparison with other similar products the Energy products show much better effect.

Storage: 10-25°C – under cool and dry conditions, preferably in a dark place.

Content: 90 capsules

Recommended daily dose: 1-3 capsules.

Do not exceed recommended daily dose. Product is not designed for children under 3 years of age. Food supplements should not be used as a substitute for a varied diet.

Keep out of the reach of children.
