

## PROTEKTIN - Creme

Protektin is a bio-information wide-spectrum regenerative cream that contains a balanced herbal complex and high volume of thermal water from the Podhajska hot spring. It primarily influences and balances the energy channel of liver, gall bladder, stomach, and spleen, controlling channel, belt channel, yang connective channel, and thus affects conditions related to dysfunction of these channels.

Due to the high volume of absolutely natural and well-trying substances Protektin has quite unique regenerative effects on the skin. The cream is based on the thermal water from the Podhajska hot spring. This tertiary seawater contains high volume of elements and minerals, and its regenerative effect is longer lasting and more profound than the effect of the Dead Sea water.

It contains salt, which has antiseptic, anti-inflammatory, blood-circulation-promoting, and purifying effect when applied topically. Furthermore, it contains harmonious composition of boric and silicic acid, magnesium, zinc, iodine, lithium, calcium, chromium, potassium, bromine, fluorine, strontium, rubidium, titanium, iron, copper, and other elements and minerals. These are primarily those elements and minerals, which have well-trying positive effect in various eczemas, rashes, and skin diseases. There are known cases of remission of various skin diseases after application of this water. Protektin contains up to 50% of this water. In the bio-information cream the volume of elements and minerals is even increased by other that are macerated from plants. Plants macerated in this water enrich Protektin with other interesting substances well known for its positive effects in skin conditions. Hardly any company is able to offer you such volume of vegetal substances.

The composition of this cream is precisely assembled, so there is no surprise in the fact that also a perfume plays its role here. It perfumes the skin and also facilitates its regeneration. The amber oil has quite unique effects on various strains of microorganisms and on the regeneration of the skin cells. Succinic acid has also strong effect on regeneration.

Protektin contains wine vinegar. This pure natural substance easily removes itching in various rashes in very short time. Some essential oils with refreshing effect that are included in the perfume also facilitate this. Wine vinegar has very good antibacterial and anti-inflammatory effects. They prevent growth of fungi and facilitate restoration of pH of the skin. It contains so-called AHA complex that has positive effect on regeneration of the skin. Highly bioactive substances developed by the Energy Biotechnology laboratories faster remove rashes; improve condition of problematic skin. E.g., in cases of acne it speeds up a healing process.

These substances include energines, a special type of polysaccharides. Among others, they have a protective effect against various types of radiation. They speed up regeneration of the skin after herpes and herpes viruses skin conditions. In the literature there are descriptions of the direct effects on this virus and a number of others. These effects are even increased by the extracts from Californian earthworms and caviar snail. Furthermore, Protektin contains humic substances, extracts from the tertiary plants and peat that are known for their protective effects against various types of radiation and for positive effects on removal of herpes viruses. The cream has an advantage that it could be easily washed down with water. For centuries the resins included in Protektin were used for treatment of non-healing wounds and for mummification, which shows their antibacterial, anti-microbial, and anti-mycotic effects. Myrrh and incense were used already in the ancient Egypt and were paid for with gold. Dragon's Blood was used in the Canary Islands. Current research has confirmed already known effects of these resins and discovered others, such as anti-inflammatory, antioxidant, and immunostimulating. Other resin is known as dammar or copal. It is a very good protection against the growth of fungi. It is the resin with very pleasant scent. It is gained either fresh from the bark of kauri tree (araucarias) or it is found in the earth like amber. All these excellent ingredients are mixed together in unique way, and you can try their beneficial influence on the skin regeneration.

Try Protektin as a skin cleaner together with other preparations of the pentagram. Quality of your skin – resilience and elasticity – depends on the function of lungs. Those could be stimulated by the preparations Vironal and Droserin. This way you can help your skin a lot. Renol could help you with removal or reduction of acne. Rashes, eczema and psoriasis could be treated with Regalen, Renol and the big king King-Kong. It contains mainly smilax, which, as was found out, can reach up to 70% success and burn-out of psoriasis after five months of its regular application. For impure and neglected skin use Protektin on a regular basis.

**Linaria vulgaris:** contains formic acid, malic acid, and acetic acid. It has excellent effects on various types of rashes and purulent wounds. **Chelidonium majus:** has very positive effect on various skin conditions, warts, allergies, and fungi. It is also used in treatment of serious liver and gall bladder diseases. **Anthyllis vulneraria:** contains flavonoids and shows excellent results in treatment of non-healing wounds, fractures, frostbites, bedsores, burns, and skin inflammations. **Equisetum arvense:** contains silicic acid and flavonoids, and is used in treatment of bleeding, non-healing wounds and eczema. **Galium verum:** has a positive effect on functioning of the lymphatic system, spleen, liver and kidneys. It may also be used in treatment of swellings, skin inflammations and ulcers. It contains saponins, resins, and enzymes. **Viola tricolor:** contains slime, rutin, and other flavonoids. Applied topically it has positive effect on eczema and allergic rashes. **Symphytum officinale:** contains slime and allantoin that is excellent for regeneration of damaged tissues. It speeds up healing of fractures, inflammations of muscles and joints. **Arctium lappa:** is used in treatment of gout, rheumatism, chronic eczema, and various types of inflammation, acne, and impure skin. **Hamamelis virginiana:** It is an old Indian remedy containing flavonoids. It removes itching in eczema, reduces inflammation, and has the astringent effect on the skin. **Acorus calamus:** facilitates the healing of eczema, strengthens the nervous system, promotes blood circulation in the skin, and has anti-allergic effect. **Geranium robertianum:** contains tannins, malic acid, and phenol with antiviral effects. It is used in treatment of oozy skin eruptions and various types of eczema. **Fumaria officinalis:** strengthens liver and acts against spasms. It is one of the best plants used in treatment of skin diseases. It alleviates migraines. **Sophora japonica:** The excellent plant for treatment of skin diseases, including psoriasis, which contains high volume of rutin. It has positive effect on allergies and psoriasis. **Scutellaria baicalensis:** has very strong protective effect on liver. It acts as a sedative, and contains steroid saponins, flavonoids, and organic acids. It has the overall strengthening effect on a human body. **Galega officinalis:** contains plant hormones and has the positive effect on various types of eczema and regeneration of skin. **Bellis perennis:** contains flavonoids, saponins, slime, and organic acids. Topically it is applied on various lichens, rashes, psoriasis, and acne. **Glycyrrhiza glabra:** contains plant hormones similar to corticoids and has strong regenerative effect on the skin. It treats inflammations and has anti-allergic effect. **Calluna vulgaris:** is used in kidney diseases. It contains many mineral substances and has positive effect on various skin eruptions and acne. **Aralia mandshurica:** contains saponins; overall strengthens the organism; acts against fungi and to some extent it has also anticancer effects. **Drago:** The Draco tree resin or dragon's blood has strong antioxidant, anti-inflammatory and anti-microbial effects. It improves functioning of the immune system and heart.

**Storage:** 10-25°C, keep dry  
**Content:** 50 ml // 250 ml

Furthermore, the cream contains vitamin A, E, lecithin, Peruvian balm, vegetal oils: evening primrose, linseed, castor, soybean, peanut, lavender, geranium, tea tree, ginger, and the information from minerals and other natural substances. The complex of bioactive substances from the plants, minerals and bio-information may be used for harmonization of the energy channels in conditions affecting liver, gall bladder, stomach, spleen, and pancreas. It is very suitable for the eczematous and problematic skin with tendency to the skin eruptions. It soothes itching of the skin and prevents the growth of fungi.

The regenerative effects of thermal water, natural resins, and amber oil could be also used in acne, psoriasis, lichens, herpes, allergic rashes, skin inflammation conditions, non-healing wounds, and as a supplement in the treatment of vitiligo. The peat extracts and energines increase skin protection against various types of radiation, e.g., during irradiation in the treatment of people suffering from cancer and during visits to solarium. In some cases Protektin could be used to alleviate reverse symptoms while going through a homeopathic therapy without suppression of the disorder symptoms, mainly in the cases when the reverse reaction shows itself by the aggravation of the skin eruption.

The combination with the Energy preparations Regalen, Renol, and King-Kong is recommended.

**Regeneration process and application:** The cream is applied topically on problematic places in very thin layer from once up to three times a day. It is easily smeared and then washed off with water. Other applications are possible in the places above single organs or in the area of their reflexive zones and energy channels. In severe health problems always consult your physician. To specify diagnosis the machines based on EAV or some other methods may be used.
