

## RUTICELIT - Creme

Ruticelit is a bio-information wide-spectrum regenerative cream that contains a balanced herbal complex and high volume of thermal water from the Podhajska hot spring. It primarily influences and balances the energy channels of heart, spleen, pancreas, large intestine, liver and kidneys. It contains liposomes with the peat extracts. Research confirmed that these extracts have anti-inflammatory and antineoplastic effect. The main ingredient of Ruticelit is a plant substance rutin and a number of other flavonoids. Rutin and other flavonoids are plant antioxidants with much higher effect than vitamin E. They prevent skin from aging. Flavonoids have positive effect on allergies, infectious diseases, hypertension, swellings, and atherosclerosis. They lower the blood coagulability and affect mainly consistency and elasticity of the vascular capillaries. To this contributes also the volume of silicon, fluorine, and lecithin.

Up to 50 % of highly charged thermal water from the Podhajska hot spring creates the basis of this cream. With its rich mineral composition this briny tertiary seawater is absolutely unique all over the world. Its regenerative effect is longer lasting and more profound than the effect of the Dead Sea water. This water contains the high volume of boric and silicic acid, magnesium, and many other minerals. All these vital elements have proved their worth in treatment of the skin allergies as they significantly speed up the regeneration of skin. The Podhajska thermal water contains a unique composition of minerals substances that create 100% natural peeling effect. It means that it facilitates a thorough removal of necrotic epidermis. Anyone can try the perfect smoothness of skin, rejuvenating and anti-wrinkle effects by regular application on his/her skin. Salt contained in the water has antiseptic, anti-inflammatory and cleaning effects. It heals burns and removes eye weariness. The cold pressed plant oils, contained in the cream in a composition, have excellent effects on burns. E.g., comparing to fatty oils the linseed oil is more advantageous as it does not close in the heat. It creates a protective film on the skin and its excellent effects on the skin disorders have been mentioned already in the Bible. The combination of AHA fruit acids, zinc, and special enzymatic extracts from the Californian earthworms has a positive effect on the vascular system and removal of the skin itching. The cream is also suitable for treatment of hemorrhoids. Furthermore, those suffering from them should temporarily refrain from eating fish and eggs, which brings the energy down, and should take Korolen that disperses the energy. Ruticelit contains the Peruvian balm. This resin from balsam fir has excellent antiseptic, anti-bacterial, anti-microbial, anti-inflammatory and anti-mycotic effects. These are even increased by the contents of vitamin A, vitamin E, and a natural perfume with azulene.

The Podhajska water is also characteristic with high volume of lithium. This element is used to tranquilize the body in depressions and in the insufficient function of pancreas. Pancreas accumulates this element. Lithium as a part of the cream applied topically above this organ has the positive effect on its condition. The asset of the Energy information cosmetics is its wide, easy and effective use. Even the perfume has its own place in the cream and participates in a process of regeneration. After inhaling a natural scent of the cream it influences the mental state in a nick of time. All cosmetic effects (smooth and elastic skin, antioxidant protection, AHA acids, homeopathic treatment, use of the substances with anti-inflammatory and other effects) are commonplace with the Energy information cosmetics. The company sees to the maximum effectiveness of its preparations, their purity, quality and harmlessness. Some synthetic components were tested in the laboratory as regards their possible potential harmfulness for very long time and were found to be suitable for use. This way the Energy preparations joined the rank of the top quality products, which a number of prestigious companies cannot claim.

**Sophora japonica:** the excellent plant for treatment of skin diseases. The blossoms contain up to 30% of rutin, which any other plant cannot compete with. Rutin has a positive effect on allergies, hypertension, and consistency of capillaries. **Ribes nigrum:** contains flavonoids, mainly rutin, organic acids, tannins, mineral salts of boron, manganese, and magnesium, vitamin C, and some vitamins of the B-complex group. It is used in inflammations and has the positive effect on metabolism. **Solidago virgaurea:** contains saponins and tannins and improves functioning of the flaccid skin. The flavonoids of solidago virgaurea, rutin, quercetin, and campherol demonstrably lower fragility of fine blood capillaries. The substances contained in the plant treat eczema, swellings, purulent wounds, and bruises. **Sanguisorba officinalis:** inhibits bleeding of various causes and has very good anti-inflammatory, astringent, antiseptic, and anti-microbial effects. It acts against protozoan; contains tanning agents, saponins, flavonoids, vitamin C, phytoncids, and organic acids. It speeds up healing of the oozy wounds, ulcers, and hemorrhoids. **Ruta graveolens:** contains flavonoid derivative of rutin, tanning agents, bitter principles, malic acid, and alkaloids. It has sedative effects and is used in treatment of skin and nerve diseases, palpitation, flush, fragility of capillaries, swellings, calf pain, and insufficient blood microcirculation. **Fagopyrum vulgare:** contains flavonoids – rutin and hyperosid, silicic acid, and a number of elements beneficial to the organism. It is used in eczema, skin itching, fragility of capillaries, varicose veins, diabetes, and hemorrhoids. **Ginkgo biloba:** promotes peripheral blood circulation and has antibiotic effects. It contains flavonoids, carotenoid tinctin, and organic acids. It is used in allergies, fragility of blood vessels, varicose veins, and hearing and brain impairments. **Equisetum arvense:** contains silic acid, flavonoids, saponins, and organic acids. It is used in bleeding, non-healing wounds and skin eruptions. **Hamamelis virginiana:** is a plant used an old Indian medicine containing flavonoids, tanning agents, saponins, and essential oils. It has proved its worth in treatment of inflammations, hemorrhoids, varicose veins, bleeding, bruises, vascular diseases, itching eczema, and frostbites. It has astringent effect on the skin. **Arnica montana:** contains flavonoids and sequiterpen lactones with anti-mycotic and anti-microbial effect. It is used in haematoma, impure skin, swellings, inflammations, fractures, and vascular disorders. **Aesculus hippocastanum:** improves elasticity and consistency of blood vessel walls. It is used in hemorrhoids, varicose ulcers, phlebitis, heart diseases, insufficient blood circulation, swellings, and migraines. **Hypericum perforatum:** contains flavonoids. It has antibiotic effects and is used in diseases of blood vessels, nerves, skin, frostbites, burns, ulcers, migraine, and haematoma. It speeds up the healing of injured tissues. **Symphytum officinale:** contains a curative substance allantoin and has an excellent effect on the regeneration of injured tissues. It speeds up the healing of fractures, polymyositis, varicose ulcers, and strains. It protects mucous membranes. **Mellilotus officinalis:** contains allantoin, flavonoids, and tanning agents. It has anti-inflammatory effects and increases the consistency of vascular capillaries. It palliates swellings, softens the skin, alleviates the pain, heals ulcers and purulent wounds. **Calendula officinalis:** contains flavonoids, carotenoids, saponins, and salicylic acid. It is used in phlebitis, strains, bruises, bedsores, swellings, skin cancer, and muscle fatigue. **Anthyllis vulneraria:** contains flavonoids, slimes, tanning agents, antocyanes, saponins. It has an excellent effect on non-healing wounds, varicose ulcers, fractures, frostbites, bedsores, burns and skin inflammations.

The cream further contains the essential oils (e.g., clove and lavender oil), virgin oils pressed cold (soybean, castor, sesame), resins (dragon's blood, myrrh, incense), and bio-information of the plants, fungi and stones (fluorspar, stibnite, malachite, purpurite, galena, adamin, cobaltcalcite, chalcopyrite, and disten). The complex of bioactive substances from the plants, minerals and bio-information may be used for harmonization of the energy channels in such vascular conditions as phlebitis, varicose ulcers, hemorrhoids, strains, bedsores, insufficient peripheral blood circulation, after the amputation of extremities, in thrombosis, for the regeneration of skin and tissue after bruises, fractures, in fragility of the fine vascular capillaries in the face and all over body.

It palliates aftereffects and speeds up the regeneration after excessive sunbathing, e.g. in solarium (apply the cream only after sunbathing). It is suitable as a supplement in skin cancer, or after irradiation. Further it has proved its worth in treatment of skin and nerve inflammations, swellings, non-healing wounds and ulcers, acne, some types of allergies and migraines, stress, pancreas disorders (diabetes), spleen disorders, heart disorders (heart attacks), insufficient vascular blood circulation, in freshening of blood vessels of legs after excessive standing, in cases of calf tension, and heavy exhausted legs. Plant substances affect some types of fungi, which influence blood vessel walls. Applied topically it influences the energetic areas of large intestine, liver, kidneys, bone marrow, metabolism, and immunity. Use in sport: before training apply Ruticelit on the muscles that will be exercised the most. The plant substances and minerals ensure better peripheral blood circulation of muscles, oxygen supply, nutrition and growth. It speeds up wash-away of uric acid and other metabolic waste products. Through Ruticelit we can substantially speed up the warm-up of muscles that has preventive effect against their strain. The natural perfume improves the mental state and concentration and instead of sweat you will spread a pleasant scent of herbs around yourself. This cream is excellent in gymnastics, bodybuilding, and aerobics.

We recommend the combination with the Energy preparations Korolen, King Kong, and Stimaral.

**Storage:** 10-25°C, keep dry  
**Content:** 50 ml // 250 ml // 500 ml

**Regeneration process and application:** The cream is applied topically on problematic places in very thin layer once up to three times a day. It is easily smeared and then washed off with water. Other applications are possible in the places above single organs or in the area of their reflexive zones and energy channels. To facilitate haemopoiesis and strengthen immunity apply on the whole area of ribs, that means thorax and back. In severe health problems always consult your physician. To specify diagnosis the machines based on EAV or some other methods may be used.
